...we'll get you started right!

You wouldn't dream of buying a car without checking it over. Or taking a test drive before parking it in your garage. Why should buying an industrial vacuum loader be any different?

At Guzzler, we think you need to know exactly what you're getting. That's why we developed the Right Start program. It's our way of providing you with the best engineered, manufactured, and serviced equipment in the industry.

## The Road to Success...

...to provide you the best engineered, manufactured and serviced equipment in the industrial vacuum market.

The Guzzler Right Start program has one goal: to improve the delivery process. It's designed to give you all the information you need to feel confident with your equipment. That way, there's less chance of unexpected operators' questions that can slow progress.

### Transportation

The first step in the Guzzler Right Start program is getting you here. Once your Guzzler is completed, we thoroughly check and test it. When we're certain that all parts are in working order, we send you a plane ticket free of charge. So you can come and pick up your new Guzzler.

### Training

Once you arrive, your training begins. We'll guide you through all the functions of your Guzzler, showing you how to operate the equipment for optimum results.

### Follow-Up

After your purchase, we won't leave you stranded. Within 30 days, your salesman will call to see if you have any questions. And since your complete satisfaction is our top priority, you'll hear from him again after 60 days.

### Trust

Of course, any time you have a question or require additional information, we are here to serve you. Just contact us at 1-800-627-3171. And get off to the right start with Guzzler's Right Start Program!
